ABOUT ME

Results-driven professional actively transitioning into Fullstack Web Development, bringing over 6 years of banking industry experience in operational, fraud, and IT/digital product risk management within SDLC environments. Currently specializing in AI-assisted engineering and building scalable applications using TypeScript, React.js, Node.js, Express.js, PostgreSQL, and Prisma. Combines deep analytical expertise and a strong understanding of compliance with technical proficiency to develop secure, data-driven digital solutions that mitigate threats and support business growth.

SKILLS

- **Languages:** JavaScript, TypeScript, SQL
- **Frontend:** React, Vite, Tailwind CSS
- **Backend:** Node.js, Express.js, REST API Development
- **Database:** PostgreSQL, Prisma ORM
- **Tools:** Git, GitHub, AI-assisted Development Tools
- **Domain Expertise & Analytics:** Risk Management Strategy, Operational Risk, Fraud Risk, General Audit, Credit Risk Cycle Management, Data Analytics & Statistics

PROJECTS

VibeFlow Inspector (Agentic AI Code Review) | Google Cloud #JuaraVibeCoding

Tech Stack: TypeScript, React, Node.js, Express.js, PostgreSQL, Google AI Studio, Cloud Run

- Engineered a modern web application for the Google Cloud #JuaraVibeCoding competition using AI-assisted "prompt-to-production" workflows, integrating Google AI Studio for rapid prototyping and deploying via Google Cloud Run to guarantee secure, serverless scalability and high availability.
- Built an agentic AI platform that solves code quality gaps by acting as an automated Senior Reviewer, scanning repositories across 8 critical domains (Security, Privacy, Compliance, Architecture, etc.).
- Project Link: [Prototype Link](#)
- Project Demo : [Linkedin Post](#)

Todo List App | Fullstack Web Application

Tech Stack: TypeScript, React, Node.js, Express.js, PostgreSQL, Zustand, JWT

- Engineered a task management application featuring drag-and-drop, optimistic UI updates, and a custom analytics dashboard.
- Developed backend services with Node.js and Express.js, implementing custom regex search and secure PostgreSQL integration.
- GitHub: [Repository Link](#)

Blog App | Fullstack Article Platform

Tech Stack: TypeScript, React, Node.js, Express.js, Prisma, PostgreSQL, JWT

- Developed a responsive fullstack platform with JWT authentication, protected routes, and a React frontend.
- Built scalable REST APIs using Node.js, Express.js, and Prisma ORM to manage complex PostgreSQL database relations.
- GitHub: [Repository Link](#)

ACHIEVEMENTS

- **Top 30 Finalist (out of 652) – Mandiri Innovation Experience (MIX) | 2023**
Co-developed "Youtube Financing," an innovative product concept offering specialized credit solutions for content creators, demonstrating strong business strategy and product ideation skills to drive enterprise revenue.
- **1st & 2nd Place Winner – Department Idea Creation Competition | 2022 – 2023**
Won 1st place (2023) out of 20+ participants by conceptualizing an "ESG Campaign" transaction monitoring feature for the Livin' app. Secured 2nd place (2022) by designing a geolocation-based "Near Me" feature to help users easily locate nearby banking services.
- **Top 10 Finalist (out of 100+) – Mandiri Tableau Competition**
Collaborated within a team to engineer an interactive data visualization dashboard using Tableau, effectively processing and analyzing complex sports datasets (badminton player statistics and match scores).

WORK EXPERIENCE

PT Bank Mandiri (Persero) Tbk

Team Leader Credit System Risk | Jan 2025 – Sept 2025

- Lead cross-functional collaboration between risk management, product, and technical teams to ensure the secure operation and compliance of enterprise loan systems.
- Audited system logic using SQL and Excel to discover and remediate a critical mapping gap where 5% of consumer loans lacked Auto Grab Fund (AGF) integration, effectively preventing collectibility degradation.

Officer Wholesale Channel Risk | Jan 2024 – Dec 2024

- Evaluated system vulnerabilities and mitigated operational risks for the development of enterprise digital wholesale platforms, including the Kopra application.
- Identified >20% of cash management accounts bypassing segmentation rules through SQL/Excel data analysis, driving systemic logic updates to mitigate high-cap loss and account abuse vulnerabilities.

Officer Personal E-Channel Risk | Jan 2022 – Jan 2024

- Conducted comprehensive risk assessments for evolving retail digital applications, analyzing product and operational risk data to ensure robust security and proper risk management for consumer-facing e-channels.
- Audited mobile agent banking systems and uncovered critical missing controls (lack of proper 2FA and transaction limits), prompting engineering teams to deploy security patches that prevented Account Takeover (ATO) vulnerabilities.
- Executed overall domain risk evaluations during the technical integration of 57+ Livin' Sukha third-party partners, maintaining a 100% compliance and zero-fraud record throughout my tenure.

Officer IT Improvement & Application Risk | Aug 2019 – Dec 2021

- Spearheaded IT improvement initiatives by executing in-depth application risk analyses for new enterprise software and digital tools.
- Performed comprehensive overall domain risk evaluations to facilitate the secure system onboarding of 50+ Open API partners, sustaining a zero-fraud and zero-compliance breach record throughout my tenure.

EDUCATION

Purwadhika Digital Technology School

AI Fullstack Web Development Bootcamp | Jan 2026 – Aug 2026

Universitas Gadjah Mada (UGM)

Bachelor of Engineering in Industrial Engineering | 2018

GPA : 3.64/4.00 (Cumlaude)
